Flood zones surrounding the Glenville Well-field, Glenville, New York

Map based on Schenectady County GIS layers for orthophoto and flood zone overlaps. Orthophoto taken October, 2011. Purple cross hatch is area of 0.2% annual probability in inundation, and light blue cross-hatch is the zone with a 1% annual probability in inundation. Purple-blue shading is the new area of 1% annual inundation (aka 100 year floodplain). Prepared by J.I. Garver, Union College, January, 2013.
