

# Rain Barrels

## What is a rain barrel?:

- an easy method used to collect excess rainwater, which can then be reused in the future to help your water supply needs.

## How it works:

- When it rains the water will run off the roof and into the gutters. The gutters will then funnel the water directly into a rain barrel for storage. This water can then be used whenever you please.

## What is the water used for?:

- Watering flowers
- Watering vegetables
- Washing a car
- Drinking water for animals
- Watering grass

# Coloring Sheet

Instructions: Color in every picture that the rain barrels water can be used on.
